ACADEMIC PROJECTS

Spotify Clone [LINK]
HTML, CSS, JavaScript | Responsive Design **| Audio Functionality**
- Developed a responsive Spotify clone that adapts seamlessly to all device sizes.
- Implemented custom audio player with play, pause, and stop functionalities using JavaScript.
- Created an interactive music explorer allowing users to browse different music categories.
- Focused on UI/UX design for smooth navigation and modern look.

Weather App [LINK]
HTML, CSS, JavaScript | API Integration | Responsive Design
- Developed a responsive weather application using vanilla HTML, CSS, and JavaScript.
- Integrated OpenWeatherMap API (or any API you used) to fetch and display real-time weather data.
- Displayed key weather information such as temperature, humidity, wind speed, and conditions.
- Designed a clean and intuitive UI with responsive layout for mobile, tablet, and desktop screens.
- Implemented user input functionality to search weather by city name dynamically.
